DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification; **specifically page 8, line 14-15 refers to "An Embedded Frame Buffer For Graphics Applications"** is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.
2. In accordance with 37 CFR 1.98(a)(2), requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. **Specifically, page 8, line 14-15 refers to "An Embedded Frame Buffer For Graphics Applications" in Appendix A, which has not been received.** It has been placed in the application file, but the information referred to therein has not been considered.

Drawings

3. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

4. Figure 1 (as illustrated in previous applications both now patents, US 6,031,783 and US 6,026,044) should be designated by a legend such as --Prior Art-- because only that which is old is illustrated as stated in specification page 1, line 12. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

5. Claims 20 and 22 are objected to because of the following informalities: Claims 20 (line 7) and claim 22 (line 2), both state "**purality**" they should state "**plurality**". Appropriate correction is required.

Double Patenting

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 2614

Claims 20-25 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims ²⁰2; ²¹3&5&10; ²²5; ²³2&5; ²⁴2&5 and ²⁵2&5 respectively of prior U.S. Patent No. 6,031,783. This is a double patenting rejection.

The claims are not patentably distinct. US Patent 6,031,783 claims storing video data representing one tile of video display pixel information where the video data is stored in one row per array in non-adjoining arrays, where the arrays are organized in 2 or more groups of arrays. Also, US Patent 6,031,783 claims the video data comprising any given screen display line is stored substantially entirely in either even numbered arrays or substantially entirely in odd numbered arrays. The current application claims segmenting/dividing the plurality of pixels and storing data either in the odd numbered arrays or even numbered arrays.
